When George Broadhurst casually testifled in court one day this week that his royaltles from "The Man of the Hour" had been \$200,000 or \$250,000 -no dramatist, you know, troubles to count a few stray thousands-attention was drawn to the sometimes lucrative profession of playmaking A marvelling public was again convinced that it pays to be a good, hard-working playwright. Not long ago Miss Margaret Mayo was reported to have rolled up \$300,000 in one year by the same simple means. But that's another story to be touched on later. The indubitable fact is that more than

Just as among actors there has been for generations an artstorracy of the stage, there is now a plutocracy of playwrights. Some say that Charles Klein is the richest man drawing royalties, others that Augustus Thomas wears the golden crown, and still others that George Brodhurst considers anything less than a million dollars small change.
